Metrics we watch and Optimize for:

- Initially, the video focused campaign KPI was completed video view percent, but there are better metrics for video campaigns!
 - We looked at organic lift in markets target markets
- We made the objective for platform optimizations to be clicks instead of completed views so that we could better see how these targeted users were engaging with the site.
- Organic lift in markets never targeted before.
- Our session duration was not very high, so we created a more robust piece of content to send users to.
 - Focus on time on page , page depth, and assisted conversions

*An example of data we saw in the Atlanta DMA

Metrics we watch and Optimize for:

- Site clicks, Click-Thru Rate
- Time spent on site
- Goal completions on site (Ticket Info Pageview, Hours & Location Pageview)
- Users by metro area/DMA
- Finally, a double check of ticket purchase zip-code info from DPA team
- What we found? While every metric we used to determine "high-quality site traffic" pointed toward Atlanta being a top market, their ticket sales said the opposite.
